- If any of the following situation arises, get the equipment checked by a service technician:
  * The equipment has been exposed to moisture
  * The equipment has been dropped and damaged
  * The equipment has obvious sign of breakage
  * The equipment has not working well or you cannot get it work according to User’s Manual.
**Introduction**

The Media Player allows you to instantly enjoy your digital photos and using only your TV. Computer is not required; making it a perfect gift for someone who doesn’t have a computer, but likes to see pictures of loved ones.

Media player owns a special design can support all kinds of memory cards in common use such as Compact Flash(CF), Micro-driver(MD), Smart Media(SM), Secure Digital card(SD), Multi Media card(MMC), Memory Stick card(MS).

A USB1.1 interface available for both notebook and desktop computer, Media player provides the ability to write data to and read data from flash memory without connecting your digital device directly to a computer as card reader.

To use, simply plug the memory card from your digital camera into the media player, sit back, relax and enjoy the show!
