Federal Communications Commission and Industry Canada Radio Frequency Interference Statements

This equipment generates, uses, and can radiate radio-frequency energy, and if not installed and used properly, that is, in strict accordance with the manufacturer’s instructions, may cause interference to radio communication. It has been tested and found to comply with the limits for a Class A computing device in accordance with the specifications in Subpart B of Part 15 of FCC rules, which are designed to provide reasonable protection against such interference when the equipment is operated in a commercial environment. Operation of this equipment in a residential area is likely to cause interference, in which case the user at his own expense will be required to take whatever measures may be necessary to correct the interference.

Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

This digital apparatus does not exceed the Class A limits for radio noise emission from digital apparatus set out in the Radio Interference Regulation of Industry Canada.

Le présent appareil numérique n’émet pas de bruits radioélectriques dépassant les limites applicables aux appareils numériques de la classe A prescrites dans le Règlement sur le brouillage radioélectrique publié par Industrie Canada.
Instrucciones de Seguridad
(Normas Oficiales Mexicanas Electrical Safety Statement)

1. Todas las instrucciones de seguridad y operación deberán ser leídas antes de que el aparato eléctrico sea operado.

2. Las instrucciones de seguridad y operación deberán ser guardadas para referencia futura.

3. Todas las advertencias en el aparato eléctrico y en sus instrucciones de operación deben ser respetadas.

4. Todas las instrucciones de operación y uso deben ser seguidas.

5. El aparato eléctrico no deberá ser usado cerca del agua—por ejemplo, cerca de la tina de baño, lavabo, sótano mojado o cerca de una alberca, etc.

6. El aparato eléctrico debe ser usado únicamente con carritos o pedestales que sean recomendados por el fabricante.

7. El aparato eléctrico debe ser montado a la pared o al techo sólo como sea recomendado por el fabricante.

8. Servicio—El usuario no debe intentar dar servicio al equipo eléctrico más allá a lo descrito en las instrucciones de operación. Todo otro servicio deberá ser referido a personal de servicio calificado.

9. El aparato eléctrico debe ser situado de tal manera que su posición no interfiera su uso. La colocación del aparato eléctrico sobre una cama, sofá, alfombra o superficie similar puede bloquear la ventilación, no se debe colocar en libreros o gabinetes que impidan el flujo de aire por los orificios de ventilación.

10. El equipo eléctrico deberá ser situado fuera del alcance de fuentes de calor como radiadores, registros de calor, estufas u otros aparatos (incluyendo amplificadores) que producen calor.

11. El aparato eléctrico deberá ser conectado a una fuente de poder sólo del tipo descrito en el instructivo de operación, o como se indique en el aparato.

12. Precaución debe ser tomada de tal manera que la tierra física y la polarización del equipo no sea eliminada.

13. Los cables de la fuente de poder deben ser guiados de tal manera que no sean pisados ni pellizcados por objetos colocados sobre o contra ellos, poniendo particular atención a los contactos y receptáculos donde salen del aparato.

14. El equipo eléctrico debe ser limpiado únicamente de acuerdo a las recomendaciones del fabricante.

15. En caso de existir, una antena externa deberá ser localizada lejos de las líneas de energía.

16. El cable de corriente deberá ser desconectado del cuando el equipo no sea usado por un largo periodo de tiempo.

17. Cuidado debe ser tomado de tal manera que objetos líquidos no sean derramados sobre la cubierta u orificios de ventilación.

18. Servicio por personal calificado deberá ser provisto cuando:
   A: El cable de poder o el contacto ha sido dañado; u
   B: Objectos han caído o líquido ha sido derramado dentro del aparato; o
   C: El aparato ha sido expuesto a la lluvia; o
   D: El aparato parece no operar normalmente o muestra un cambio en su desempeño; o
   E: El aparato ha sido tirado o su cubierta ha sido dañada.

Quick Start Guide

1. Plug the AVX-VGA-WI into a projector’s VGA port and power up the projector. See Figures QS-1 and QS-2.

Figure QS-1. AVX-VGA-WI.

Figure QS-2. Connect the AVX-VGA-WI to the projector.
2. Power on the AVX-VGA-WI box. When the projector shows the default menu on the screen as below, it indicates the AVX-VGA-WI unit is ready.

![Default menu](image1)

Figure QS-3. Default menu.

3. Make sure your PC WLAN is already enabled, and connect your PC with the AVX-VGA-WI unit.

4. Open your browser and it will redirect to the WPS home page automatically, or you can enter the IP address to access the Micro Wireless VGA Presentation Tool’s Web home page.

The default IP address of the AVX-VGA-WI is 192.168.100.10, or refer to the IP address shown on the left corner of the projector screen.

![Home page](image2)

Figure QS-4. Home page.
5. Download the client software (Figure QS-5). Then select the “Win7/Windows Vista/XP/2000” or “Mac Utility” and execute the installation program (Figure QS-6).

After installing the program, you will see the Micro Wireless VGA Presentation Tool shortcut on the PC screen (Figure QS-6).

![Figure QS-5. Download.](image)

6. Make sure your personal firewall allows the AVX-VGA-WI software to pass through.

7. Select the projection device.

Quick Start Guide

8. Enter the Login Code that is found on the projector screen (if required) (Figure QS-7).

![Login code on projector screen.](image)

Figure QS-7. Login code on projector screen.

9. Click the “Play” button to start projection (Figure QS-8).

![Start projection screen.](image)

Figure QS-8. Start projection screen.
1. Specifications

Compliance — FCC, UL® E199780

IP Configuration — Automatic or manual (static)

LAN Type — AP mode

LAN Protocol — TCP/IP

Network Connection — Uses IEEE 802.11b/g/n 2.4 GHz, IEEE 802.3 (10BASE-T), IEEE 802.3u (100BASE-TX)

OS Compatibility — Windows® 2000/XP/7, Windows Vista®, Windows Mobile 5 and later, Mac® OS X 10.5 or later

Screen Resolutions — 800 X 600, 1024 X 768, 1280 X 768 and 1280 x 900

Wireless Channels — 11

Wireless Encryption — IEEE standard 64/128 bit WEP/WPA/WPA2-PSK

Wireless Frequency — 2.4 GHz

Wireless Range — Up to 328 ft.

Wireless Speed — 11 Mbps, 54 Mbps, 300 Mbps

User Controls — (1) Reset button

Connectors — (1) HD15 VGA, (1) power connector

Power — Source: Interface PoVGA (Power over VGA);
  Input Voltage: 100–240 V, 0.3 A, 50/60 Hz;
  Secondary Power: 5 VDC, 1.2 A

Size — 3.75"H x 1.53"W x 0.88"D (9.52 x 3.89 x 2.24 cm)

Weight — 0.12 lb. (0.05 kg)
Chapter 2: Overview

2. Overview

2.1 Introduction
The Micro Wireless VGA Presentation Tool (AVX-VGA-WI) turns your existing “wired” projector into a “high-end wireless” projector. The unit’s plug-and-show wireless projection features provide efficient and successful presentation.

High-Performance Wireless Projection and Audio Projection
This high-performance wireless projection tool with audio enables you to share a multimedia display with several users without using cables.

Plug and Show
With the accompanying plug-and-show USB token, wireless presentation becomes easy. Just link your PC/laptop to the AVX-VGA-WI using Wi-Fi, plug the token into a USB port, and in seconds, your screen will project to the connected projector.

4-to-1 Split-Screen Projection
With this 4-to-1 split-screen feature, up to four PC screens can be projected to one projector at the same time. You can easily do side-by-side comparisons from four computers/laptops.

Macintosh® (Mac®) Wireless Projection
The Micro Wireless VGA Presentation Tool can connect to a Mac client. The Mac client software is stored in the accompanying USB token or CD-ROM. It enables wireless projection from a Mac.

SNMP Manager
The AVX-VGA-WI features SNMP management. Enable Simple Network Management Protocol (SNMP) protocol (Version 2c) to manage and configure one or more devices through a network.

Changeable Splash Screen
You can use the application “Screen Image Background Maker” to change the Splash Screen. Design the image with the message you would like to present, upload it through a Web control page, and you will have a customized starting page.

AP-Client Mode
You can enable the AP-Client Mode function to let the AVX-VGA-WI join the existing access point through Wi-Fi. This feature provides the flexibility of wireless network deployment in an enterprise environment.

2.2 Features
• Supports Macintosh (Mac) versions 10.5 and above.
• Plug and Show. No installation required. Just plug the included token into a USB port, and start wireless projection in seconds.
• Features 4-to-1 split screen projection. One projector functions as four projectors.
• Provides session security login, wireless WEP/WPA key and gatekeeper functions to protect presentation contents and keep them secure.
• You can change the splash screen image.
• SNMP Manager enables you to easily manage the devices.
• AP-Client Mode enables you to easily deploy wireless in a network enterprise.
2.3 What’s Included

Your package should include the following items. If anything is missing or damaged, contact Black Box Technical Support at 724-746-5500 or info@blackbox.com.

• (1) Micro Wireless VGA Presentation unit
• (1) power supply with US, EU, and UK adapters
• (1) quick installation guide
• (1) HD15 M/F gender changer
• (1) CD-ROM containing software and this user’s manual

USB Token Contents

The USB token consists of the following software:

Client Folder:
• Software for Windows® and Mac® OS, MobiShow software for Windows Mobile 5/6

Applications Folder:
• VDD (for virtual extended screen)
• IB Maker (for changing startup screen)
• PtG Converter (for MobiShow PtG function)
• SNMP Manager (for Wireless Presentation System device management)
Chapter 2: Overview

2.4 Hardware Description
Figure 2-1 shows the AVX-VGA-WI. Table 2-1 describes its components.

![AVX-VGA-WI](image)

3. Windows Client Utility

3.1 Starting Program
After you download the Micro Wireless VGA Presentation Tool Windows program via the Web page successfully, follow the steps below.

1. Click on the Micro Wireless VGA Presentation Tool icon to execute the program (Figure 3-1).

![Figure 3-1. Micro Wireless VGA Presentation Tool icon.](image)

2. The program starts to search for AVX-VGA-WI automatically.

3. When it finds the Micro Wireless VGA Presentation Tool, a “Login Code” dialog box pops up on the PC screen (Figure 3-2) if a login code is needed.

![Figure 3-2. Enter login code screen.](image)

3.2 Login
When the “Login Code” dialog box appears, enter the login code to start your presentation (Figure 3-3). The login code appears on the projector screen.
3.3 Main User Interface
Figures 3-4 and 3-5 show the main user interface.

3.4 Screen Projection
Click on the “Play” button to have the full or split screen immediately project to the main screen on the display (Figure 3-7). Click on the “Pause” button to freeze the projection screen. Click on the “Stop” button to stop projecting your screen.

NOTE: The buttons are located on the main control panel. Only the color is different.

</tbody>
</table>

![Figure 3-6. Menu description.](image)
Chapter 3: Windows Client Utility

3.5.1 Show Login Code
Click “Show Login Code.” It will display the login code on the right-upper corner of the desktop and close it automatically after 10 seconds. You can also click on the area to close this window manually.

![Show login code screen.](image)

3.5.2 Open Admin Web Page

Click to open the function menu and select “Web Admin” management Web page. The Web page’s detailed functions will be described in the next chapter.

![Web admin management Web page.](image)
3.5.3 WiFi AP-Client Configuration
Click “WiFi AP-Client Configuration” to set AP client mode to join other access points via wireless. The other users’ clients can also login to the WPS for presentation and join other access points in the network.

![Figure 3-9. Wi-Fi AP-client configuration screen.](image)

3.5.4 Searching Server
Click “Search Server” to search the WPS again.

![Figure 3-10. Search Server menu.](image)
Chapter 3: Windows Client Utility

3.5.5 Projection Source
When you click on the “Projection Source,” you can project the main screen of the desktop or the virtual extended screen.

P.S: Virtual Extended Screen option
You need to install the “VDD.exe” driver first. It is stored on the USB token/CD-ROM.

3.5.6 Auto WiFi Connect
Click “Auto WiFi Connect” to enable the auto Wi-Fi discovery and connection function for quick wireless setup.

3.5.7 Auto Power Manager
For the highest projection performance, the application will turn the PC’s windows power scheme from current settings to “highest performance.” However, you can click the “Auto Power Manage” to enable or disable this function and restore your power scheme.
Chapter 3: Windows Client Utility

3.5.8 Hide UI
Click on “Hide UI” to hide or display the application control panel on the projection screen.

3.5.9 Advanced Screen Capture
Click on “Advanced Screen Capture” and you will be able to see tip windows and other layered windows (including the main UI) on the connected display. However, the mouse cursor may blink from time to time when you are projecting your PC screen.
Disable “Advanced Screen Capture.”
Chapter 3: Windows Client Utility

Tip window is not shown in projector.

Figure 3-15. Disable advanced screen capture.

Enable Advanced Screen Capture.

Tip window is shown in projector.

Figure 3-16. Enable advanced screen capture.
3.5.10 Make WPS Token

Click “Make WPS Token” to make a USB WPS Token. You can insert a USB thumb drive and follow the wizard to make the Token.

![Figure 3-17. Make WPS Token screen.](image1)

![Figure 3-18. Install flash drive.](image2)
3.5.11 Copy Application to Desktop
Click “Copy Application to desktop.” It will immediately copy the application to your desktop even if you don’t have the system privileges.
3.5.12 Hotkeys
Click “Hotkey” to show the hotkey guide. You can use hotkeys to control the projection with the keyboard.

![Hotkey screen]

3.5.13 About
Click “About” to show system information, including product model name, client version, IP address, and other information.

![About screen]
Chapter 3: Windows Client Utility

3.5.14 Exit
Click “Exit” to exit this application. It will stop current playing status and close the application immediately.

Figure 3-23. Exit menu option selected.
4. Mac Client Utility

4.1 Launch Application

1. Enable your Wi-Fi and connect to the Micro Wireless VGA Presentation Tool device (Figure 4-1).
2. Execute the Micro Wireless VGA Presentation Tool client software for Mac.

![Figure 4-1. Software launching.](image)

3. Launch the Micro Wireless VGA Presentation Tool software and enter the login code (Figure 4-2).

Chapter 5: Web Management

5. Web Management

5.1 Home Page
1. Make sure your PC connects to the Micro Wireless VGA Presentation Tool box successfully.
2. Open your browser, and it will open the Micro Wireless VGA Presentation Tool home page (Figure 5-1) automatically.
3. If not, enter your IP address in the browser, and you will see the IP on the projector screen.
4. The default IP is 192.168.100.10.

![Figure 5-1. Home page.](image)

5.2 Download Software
1. Select “Download software” function.
2. Select the “Win 7/Windows Vista/XP/2000” or “Mac Utility” and execute the installation program.
3. Follow Installation Wizard instructions to proceed until the installation process is complete.
4. If you see a “Windows Security Alert” popup, then Windows firewall has blocked this program. Press the “Unblock” button to continue installation.
5. Once installation is complete, a utility shortcut appears on the screen (Figure 5-2).
Chapter 5: Web Management

</table>
5.3.2 Network Setup
There are several configuration options as shown below.

The default setting of the Micro Wireless VGA Presentation Tool box is DHCP client.

**IP Setup:**
- Select “Obtain an IP address automatically” or “Use the following IP address.”
- IP Address: The default value is 192.168.100.10.
- Subnet Mask: The default value is 255.255.255.0.
- Default Gateway: The default value is 192.168.100.10.
- DNS Server: The default value is 192.168.100.10.
DHCP Server Setup:
- You can select “Auto Enable/Disable DHCP Server” or “Disable.”
- Start IP: The start IP address of DHCP Server.
- End IP: The end IP address of DHCP Server.
- Subnet Mask: The default value is 255.255.255.0.
- Default Gateway: The default value is 192.168.100.10.
- DNS Server: The default value is 192.168.100.10.

Wireless Setup:
- Wireless LAN: The default value is “Enable.”
- Connect to Existing AP: Input the SSID of the Wi-Fi AP you want to connect to.
- Region: The default value is “Worldwide.”
- SSID: SSID string, max. length is 32 bytes.
- SSID Broadcast: The default value is “Enable.”
- Channel: Use to set fixed channel or Auto. “Auto” means, after powering on the Micro Wireless VGA Presentation Tool, it will scan all wireless channels and select one channel automatically.
- Encryption: Select “Disable” or one of WEP/WPA/WPA2 64 bit or 128 bit in ASCII or HEX string.
- Key: If Encryption is enabled, you have to set the key value according to the encryption mode you selected.

Apply: Press button to select this mode.
Cancel: Press button to abort action.

5.3.3 OSD Setup

Figure 5-7. OSD Setup screen.
Click on the “OSD Setup” button to change the OSD wallpaper (Figure 5-7).

- **Restore Initial**: Restore to default OSD wallpaper.
- **Image File Upload**: Upload the customized OSD wallpaper. (You need to convert the image to a system-defined format first using the provided IB Maker utility which is stored on the USB token.)

### 5.3.4 Projection Setup

![Projection Setup screen](image)

Figure 5-8. Projection Setup screen.

Click on the “Projection Setup” link (Figure 5-8).

- **Resolution**: XGA (1024 x 768), WXGA (1280 x 768, 1280 x 800) and SVGA (800 x 600). The default value is XGA.
- **Screen Refresh Rate**: This is the VGA output refresh rate. It provides 60 Hz and 75 Hz rates for different kinds of projectors.
- **Login Code**: Select “Disable,” “Random,” or “Use the following code” to set a specified 4-character number.
- **Apply**: Confirm and save modifications.
- **Cancel**: Cancel all the modifications.
5.3.5 Change Passwords

Click on the “Change Passwords” button, to change the password value. The length of the password is up to eight characters (Figure 5-9).

- **Enter New Password**: Enter a new password you want to change for each category.
- **Confirm New Password**: Confirm new password.
- **Apply**: Confirm and save modifications.

5.3.6 Reset to Default

Figure 5-10. Reset to default screen.
Chapter 5: Web Management

Click on the “Reset to Default” button to restore factory default settings (Figure 5-10).

Apply: Confirm and continue.

5.3.7 Firmware Upgrade

![Figure 5-11. Firmware Upgrade screen.](image)

Click on the “Firmware Upgrade” button to upgrade firmware (Figure 5-11).

1. First, get the latest firmware image file from the Black Box Web site (if available).
2. Click on the “Browse” button to specify the file name you want to upgrade.
3. Click on the “Upgrade” button to start.
4. A warning message is shown and a countdown counter will appear on the screen.
5. After a few minutes, a complete message will be shown on the screen.
6. Restart the Micro Wireless VGA Presentation Tool box for the changes to take effect (Figure 5-13).
