

QuietCab Elite™ Cabinet Disassembly Instructions

Follow these instructions to dismantle a fully built cabinet:

1. Remove the front and rear doors.

CAUTION: To avoid damage, place the doors and panels on a flat surface leaning against a solid wall.

2. Remove the side panels.

CAUTION: To avoid damage, place the doors and panels on a flat surface leaning against a solid wall.

3. Unscrew the depth support rails and the infill panels. Again, carefully place the components on a smooth surface to avoid damage. Keep all hardware together.

4. Remove the mounting angles, and you will be left with the bare frame.

Removing the mounting angles is shown below.

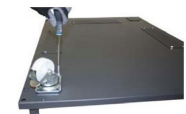

The bare frame is shown below.

5. Remove the top cover, followed by each of the corner posts.

6. Remove the casters from underneath the base.

To reassemble the cabinet, see the Assembly Instructions.
